DETAILED ACTION

Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Figs. 1-6, Figs. 7-12, Figs 13-16.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, independent claims 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Mr. Goltry on June 12 , 2001 a provisional election was made with traverse to prosecute the invention Group I, Figs. 1-6, claims 1-4, 6.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 5, 7-36 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention. Claims 5, 7-11 and 20-31 are drawn to the second embodiment Figs. 7-12. Claims 12-19 and 32-36 are drawn to the third embodiment Figs. 13-16.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4, 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Drosdak '652.

The patent to Drosdak shows an apparatus for receiving and securing an end segment of a line 6 as shown in Fig. 2. Drosdak shows a connector having a receptacle 7 including a chamber 9 bound by a substantially continuous sidewall defining an inner diameter that is substantially equal to the outer diameter of on the end segment of line 6. Drosdak shows extensions 10 extending into the chamber and spaced at intervals along the entire length of the chamber. Drosdak shows

the receptacle supporting means 1 for engaging and supporting a lure 5. The leader has a coupler 11-12.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Klein, Drosdak, Klein, Klein, Wagner, Klein, Ratte, Anspach, Ouelette, Hennon, Schwarzer, and McMahon show other connectors.
